

OS HW3 report

Name: 梁詠晴

Student ID: 109550134

Question	Answer
Q1. Briefly describe about your data structure for recording process' time or anything you need to record.	<ul style="list-style-type: none">• While loop 計時、檢查 done 數量• 使用 vector 存 arrived process• 用 struct process 存 process 的各種資料
Q2. How to simulate process scheduling?	<pre>While(!done){ ->check arrived ->find process to run from arrived queue ->check if process done Time++ }</pre>
Q3. Some problems you meet and how to resolve.	Multilevel 時，在跑 fcfs 時有新 process 到的情況沒處理好 (fcfs 的內部移動)。後來新增了一些針對各種情況的 flag 就解決了

Q4.

What you learned from
doing OS hw3 and
something you want to
discuss with TAs.

測資有點少，差點沒發現程式
有 bug，希望下次助教能多提
供不同情境的測資，謝謝助教
~
